

Dräger PX4500 Pressure and tightness measurements

The multifunctional Dräger PX4500 for testing tasks on natural gas pipelines, liquid gas pipelines and drinking water installations is particularly handy and light, yet very robust. Its large touch screen makes it particularly user-friendly. The industrial version Dräger PX4500-i is tailored to industrial needs with special accessories.

Product advantages

Line testing

In addition to the manual pressure measurement and leak test, the unit contains predefined measuring programmes for:

- Leak test (150 hPa/150 mbar) and load test (0.1 MPa + 0.3 MPa / 1 bar + 3 bar) on gas pipes (DVGW TRGI 2018)
 - Leak test (150 hPa / 150 mbar) and strength test (0.1 MPa / 1 bar) on liquid gas pipes (TRF)
 - Leak test (150 hPa / 150 mbar) and load test (0.1 MPa or 0.3 MPa / 1 bar or 3 bar) on drinking water installations (DIN EN 806)
 - Leak test with water (0.6 MPa / 6 bar) on press connections of drinking water installations (DIN EN 806)
 - Leak test with water (1.1 MPa / 11 bar) on metal, multi-layer composite and plastic pipes of drinking water installations
 - Drinking water installations (DIN EN 806)
-

Preset measuring programs

The Dräger PX4500 contains general measurement programs and specialised measurement programs for frequently used tests and measurement programmes with predefined parameters according to the regulations or standards.

The measurement process is particularly clear at all times with the help of the scrolling diagrams on the display.

Pressure measurements up to 2.5 MPa (25 bar)

The internal pressure measuring range up to 160 hPa (160 mbar) is extended by optional external digital pressure sensors up to 0.35 MPa or 2.5 MPa (3.5 or 25 bar).

Leak test according to DVGW TRGI 2018

The Dräger PX4500 quickly and precisely detects leaks in new or existing piping systems. The leak test is carried out fully automatically.

Large touch screen

The touchscreen is 3.5" in size and is therefore particularly user-friendly. With its well-structured user software, the PX4500 is very easy to operate.

Low weight and handy format

With its 345 g, the PX4500 is a lightweight and, in combination with its ergonomic housing, fits particularly well in the hand. The housing is nevertheless robust and can withstand rough conditions of use.

USB type C (USB-C)

The USB type C has a symmetrical plug. So it no longer matters how it is plugged in. Also, even faster charging is possible, even on the go, such as in the car via USB port.

Fastening kit

The combination of Velcro and magnet guarantees a flexible and adaptable application.

Product advantages

Robust equipment case

The new equipment case is extremely robust and splash-proof. The lid has a load capacity of 100 kg. The stackable system guarantees easy and flexible connectivity, i.e. several cases can be stacked on top of each other, even if the cases have different sizes. This feature is particularly practical when several suitcases have to be transported at the same time. The case also offers an extra carrying handle in the lid for even more comfort. Thanks to the practical division inside the case, accessories can be easily stowed away.

Office-to-go with the Dräger mCon app

The app provides the best mobility and immediate access to all current measurement data. Via Bluetooth, all data is transferred directly from the measuring device to the smartphone or tablet. Measurement protocols with company logo and data are easily and quickly available as a pdf and can be sent by e-mail.

iOS

Android

Extensive documentation options

Maximum ease of use also includes optimal measurement and customer data management with import and export functions for customer data. Measurement results can be saved and transferred to the PC. The measurement data is linked to customer or plant data and output by means of ready-made measurement reports with company logo and address. Alternatively, the measurement data can be printed out on site via a Bluetooth printer.

Industrial version Dräger PX4500-i

Compressed gas systems with pure and/or technical gases involve a considerable hazard potential in many areas. The reasons for this are the high pressure in the cylinder and possibly toxic, corrosive, flammable or fire-causing gases. Regular maintenance not only prevents malfunctions and downtime of a system, but is also essential to comply with prescribed regulations. To perform leak tests on gas systems, the Dräger PX4500-i is a reliable partner that delivers safe results quickly and easily.

With the new multifunctional Dräger PX4500-i 25 bar set you are always on the safe side and equipped for complete leak tests of the entire system. Special adaptations and the new 25 bar sensor offer a wide range of connection options and are ideally suited for tough operating conditions thanks to their pure stainless steel design. Thanks to intuitive menu navigation and predefined measuring programmes, you can quickly detect leaks in new or existing pipe systems with the PX4500-i.

Accessory

Gas pressure hose with bayonet connector

For measurements of gas and flow pressure

Pump adapter 150 mbar with autovalve connection

Pump adapter 10 bar with autovalve connection

1/2" adapter (max. 30 bar)

Accessory

5600842

Single pipe cover

5600875

Pressure sensor EP35 with autovalve connection

5600877

Pressure sensor EP250

Equipment case 4x00

Extremely robust, splash-proof case with stacking system

Accessory

5600880

Hand pump

5600801_P3

Dräger P3

The handy Dräger P3 pressure tester allows for quick and easy differential-pressure measurements. The ideal tool for service and maintenance, the device performs a variety of measuring tasks.

p7tdx-prph-5600803 (1)

Dräger P7-TDX

The P7-TDX is ideal for testing gas pipes and drinking water installations as well as for pressure tests up to 0.3 MPa (3 bar). Optionally, water pipe tests or pressure tests up to 2.5 MPa (25 bar) can also be carried out using an external sensor. The P7-TDX performs the leakage measurement in best time. Other functions include ambient pressure and temperature-corrected long-term measurement and the pressure monitor for monitoring unusual pressure curves.

Technical data

Display	Colour display with touch screen
Interface	Bluetooth LE for smartphone and printer
Power supply	Rechargeable battery: Li-Ion, 3.6 V / 2,700 mAh; power adapter: 5 V DC / 1.5 A
Operating time	Up to 10 h
Operating temperature	+ 5 °C ... + 40 °C
Storage temperature	- 20 °C ... + 50 °C
Air pressure	800 ... 1,100 hPa
Humidity	10-90 % RH non-condensating
Dimensions	ca. 90 x 200 x 35 mm (hwxwd)
Weight	Approx. 345 g

Display	Measuring range	Resolution	Accuracy	Max. gauge pressure
Micro-pressure I (air / gas)	- 10 ... + 100 hPa	0.01 hPa	± 0.5 hPa or 1 % of MV ¹	750 hPa
Micro-pressure II (air / gas)	100 ... + 160 hPa	0.1 hPa	± 0.5 hPa or 5 % of MV ¹	750 hPa
Pressure (ext. sensor, option air / gas)	- 100 ... + 3,500 hPa	1 hPa	1 % of MR ²	4,000 hPa
High pressure (ext. sensor, option air / gas / liquids)	0.01 ... 2.5 MPa	0.001 MPa	1 % of MR ²	3.5 MPa

¹ = Measuring value

² = Measuring Range
